vehicle tracking system

Real-Time Fleet Management and Security

GPS based vehicle tracking system in India
that will suits your tracking needs.

Smarterping - one of the leading vehicle tracking systems in India allows you to view the location of your fleet vehicles in real-time, 24 hours a day from anywhere. Our GPS vehicle tracking system also provides a list of your vehicles showing the status of each, which includes when a vehicle is started up and shut down, idling status, location and speed. Apart from this Smarterping, gives you real time alerts via Email for all-important things like Over Speed, SOS, Geo Fencing etc.

Features

Historical and Real Time Tracking

Our GPS Solution not only gives you real-time tracking capabilities, but also lets you view a complete history of all tracking sessions recorded over time. This allows you to accurately develop trends, track long-term driver performance, and more.

Fleet Status Dashboard

Fleet status dashboard is a single view solution for our clients to view overall status of complete fleet.

Alerts and Notifications

Smarterping auto sends alerts and messages when anything goes wrong or something happens which is worth bringing to notice.

Administration

Smarterping is equipped with robust administrative features to helps our customers easily manage various features and informations.

History

Smarterping regularly records the history of all the vehicles. Smarterping helps to replay or see all the historical activities of a particular vehicle or entire fleet.

Reporting

Our GPS Backend has a robust reporting framework providing access to a wealth of data for streamlined operations and critical information gathering including driver safety, vehicle utilization and more.

Vehicle Maintenance

Smarterping provides fleet/vehicle owners with a state of art reminder of scheduled vehicle maintenance events.

Data Security

Designed with tough security features built in, our GPS Platform ensures that your private fleet/vehicle/asset data is kept secure at all times.

Fuel Monitoring

Smarterping helps manage and record fuel level of vehicle, which in turn helps our clients to control expense on fuel/gas.

Geofencing without Limits

Spatial fences allow you to confine objects to a prescribed geographic region. Alerts can be sent upon entering and/or leaving the fenced zone as well as in the event of delayed vehicle or asset. An unlimited number of geofences can be assigned in our trucking fleet management software.

Identify Vehicle Misuse

With Smarter ping you can be rest assured if your car is being driven around safely by your chauffeur. You can also identify unauthorized trips made by the driver. With you tracking the vehicle on real time basis, your chauffeur had better drive carefully.

Track vehicle from your smartphone and web

You can track vehicles, see historical information, receive alerts, manage users, see reports etc. all with a smart phone or an iPad or tablet PC.

smarterping

Real Time Management of following events and Information's

- Location
- Tracking
- Over Speed Alarm
- Average Speed Alarm

- Vehicle Theft
- Move Duration
- Stop Duration
- Fuel consumption

How does GPS Vehicle Tracking work?

GPS Satellite — Your GPS Device — Mobile Network — Smarterping

Your Computer — Internet

This is a question we are answering for a long time now. There are two types of GPS tracker system, the data pullers and data pushers. The way these things operate are different but the end result is similar, you come to know where your car had been and where did it stop for how long, what direction it took and how fast it drove, all the data from these GPS tracker systems. Some can give you real time information on your smartphone or your laptop, while some can dump the data after the car has reached a safe house and the attached GPRS device is removed. It all depends. The best news is, Sathya Technosoft can easily handle all the different types of GPS systems and install, maintain, troubleshoot and upgrade every piece of equipment.

We have a flexible licensing model that allows organizations to purchase a level and edition that best fits their usage requirements now, and to upgrade as more features are required. In addition, each new product purchase includes online support at no additional charge.

General Features	Access Plan A1
Subscription to online software	1 Year
Cost of 1 object / 1 Year access	₹ 1500
